| Name | Style | Average | Handicap Average | |
| Jack Holderness | BB | 348 | 185 | 533 |

As Jack is the only junior at present posting results he is included in Division 3

The average scores are now based on 36 targets

$$36 \times 24 =$$

$$864$$

36 x 20 = 720
 36 x 16 = 576

The handicap system is designed to compensate for the bow style and the capability of the member. The initial handicap is based on the system used for the SW Crown to compensate for differences in Bow Style.

| Bow Style Handicap (SW Crown) 40 targets | | | | 36 |
|--|-----|--------|-----|-----|
| American Flat Bow | AFB | Gents | 259 | 233 |

| Unlimited | UL | Gents | 53 | 48 |
| | | Ladies | 103 | 93 |
| Cross Bow | XB | Gents | 53 | 48 |
| | | Ladies | 103 | 93 |

To give more people a chance to win the group is split into four divisions, and progress upwards as their average score progresses.

The handicap is calculated from the average of the best six handicapped scores recorded for each archer within the last 12 months, and this value will be used to decide on the division.

Within the division the winning archer will have the highest handicapped score. This is the adjusted score

Maximum score for Big Game on 36 targets is $24 * 36 = 864$ so anyone with an average handicapped score over 864 will have their handicap reduced to give a total of 864, this reduced handicap will be used in

If an archer changes bow style then the handicap will be adjusted using the difference in values for the two style handicaps.
